

# FASTCRETE

## فاست كريت

### Fast Setting Admixture for Cement mixtures and for Semi-Dry mixtures (Bricks, Tiles, and Interlock)

#### Added Value:

**Fast Crete** is a water-based product economic, easy to apply and helps strengthen the concrete and cement mixtures faster than ordinary way and it also helps after full dry and interaction with components of concrete and cement mixtures to prevent the appearance of the white material on the surface of bricks, tiles, and interlocks.

#### Economic and easy to apply

- Open addition from 1 – 3 % to the weight of concrete to obtain a fast setting and the required strength.
- Supplied in 5, 25, 1000 liters
- **FastCrete** is added with the mixing water of concrete and cement mixtures.

#### Specifications

- **FastCrete** is a viscous liquid, and doesn't contain any impurities.
- Density = 1.17 kg / liter.
- PH: 10-11.
- Doesn't contain any harmful or poisonous materials.
- Product validity is 1 year of production year.

#### FastCrete Features:

 The industry of tiles, bricks, paving blocks (interlocks), and cement products in general have been developed, due to the development of production machines and lines, whether mechanical or manual but the setting rate and cement mixtures strengths have still the same resulting in delays production and transportation of products to sites.

 **Fast Crete** provides an innovative solution to most of these problems since it strengthens the semi-dry mixtures faster than the traditional one, and it also helps in obtaining early strengths faster than the ordinary one, especially in cold and winter climates.

## Applications

- **FastCrete** is used in the bricks and tiles industry.
- To obtain fast setting of decorative tiles special mixtures and faster loading and transportation.
- For faster de-mould of interlock and special concrete unit forms.
- For faster production of Interlock units colored and gray.
- **FastCrete** can be used in plasters and ordinary cement mortars.
- For the production of lightweight cement blocks and faster setting, loading and transportation.
- **FastCrete FW** is a water-based material to preserve the environment and doesn't contain any harmful materials.

## Components:

Each pack of **FastCrete** contains the latest technology of cement mixtures' fast setting additive and also strengths to obtain early strength for concrete and fast setting for cement mixtures in general in winter and cold climates for fast setting of Bricks, corridor tiles, and paving tiles (interlocks) special mixtures for faster loading and transportation safely, faster than the ordinary one.
