

GB FROW

جي بي فرو

Water-based, Form Release Oil

Added Value

GB Frow is a water-based, with strong release force, It eliminates the danger of flammability of similar products.

Also the surface finish of concrete casted using **GB Frow** is highly better due to the water-based nature of the product, since it is well known that the oily nature of traditional form release oil increases the surface air and pinholes of the concrete surface finish.

Economic And Easy to Apply

* Application rate is between 6-10 m² / Lit.

* Supplied in 20, 150 or 1000 Lit. Plastic Packs.

* Applied by Brush, Roller and preferred to be applied by spraying machine.

Product Specifications

- Clear Yellow, Water-based , Light liquid.
- Density : 1.0 Kg./ Lit $\pm$ 0.1 .
- PH: 10.
- Stable upon storage.
- Does not contain any poisonous or harmful materials.
- Water-based, No VOC, Friendly to Environment.
- Valid for 1 year in Un-opened containers.

GB Frow The Product Features:

- ♦ The need of a strong form release oil is an important essential for any project, or precast factory, since concrete tend to adhere strongly to the wall and sides of the form. All the available form release oil in the local market are solvent based materials which are flammable and dangerous.
- ♦ Due to the strong release nature of **GB Frow**, beside the water-based nature of the oil, making the **GB Frow** the unique and perfect product for both form release oil efficiency, and safety in the job site.

Components:

- Each pack contains the latest Water based oil technology which exert a very strong release force between concrete surface and the containing form whatever it is made from iron, wood, or plastic.
- Each pack also contains selective, and appropriate, biocide, preserving the product through its long shelf life, (one year).

Application Fields

- Form release oil for cast in site concrete in different types of buildings and concrete components.
- Form release oil for precast factories especially those who need good surface finish for various concrete shapes.
- Form release oil for special tiles of hard stone and flowable concrete casting in plastic forms.
- Form Release oil for the heavy tires inside the washing machines.
- To protect steel and wood forms from damage due to excessive usage.
- Where a **GREEN** and non-flammable form release oil is needed for a **GREEN** certified project.
